Date of Birth: 05.12.1995 | Nationality: Indian | Gender: Male | Languages: English

SUMMARY

- Senior Software Engineer (Mobile) with 7 years of experience across the IT industry.
- Proven expertise in end-to-end mobile application development, covering requirement analysis, UI/UX design, development, testing, deployment, and post-release optimization.
- Strong background in scalable architecture, clean code practices, and Agile/Scrum methodologies, ensuring high-performance and maintainable applications.
- Demonstrated ability to lead mobile development initiatives, collaborate cross-functionally, and deliver enterprise-grade applications with large user bases.
- Passionate about continuous learning and adoption of modern technologies to enhance development efficiency, application performance, and user experience.

SKILL SET

- Mobile Application Development
- Cross-Platform App Development
- Requirement Analysis
- Solution Design
- Agile & Scrum Methodologies
- UI/UX Collaboration
- Application Deployment
- Release Management
- Performance Optimization
- Code Review & Quality Assurance
- Flutter Application Architecture
- Android SDK & Jetpack Components
- REST API Integration
- Full SDLC Management
- Clean Architecture
- SOLID Principles
- Firebase & Cloud Integration
- Startup & Enterprise Application Development
- Team Leadership & Collaboration

TECHNICAL PROFICIENCY

- **Languages & Frameworks:** Flutter (Dart), Android (Java/Kotlin), Node.js
- **Backend & Cloud:** Firebase, Google Cloud Platform, RESTful APIs
- **Databases:** Firebase Firestore, Realtime Database
- **Tools & Technologies:** Git, CI/CD Pipelines, Android Studio, VS Code
- **Architecture & Practices:** Clean Architecture, SOLID Principles, MVC/MVVM
- **Platforms:** Android, iOS
- **Methodologies:** Agile, Scrum

EDUCATION

- Master of computer applications (MCA) - BMS College of Engineering, Bengaluru, India | Sep 2016 - Jul 2019
- Bachelor of Computer Applications (BCA) - SRNM College for Applied Sciences, Karnataka, India | Jun 2013 - May 2016

CERTIFICATIONS

- Clean Achitecture & SOLID Pinciples for Adroid Kotlin - 2020

WORK EXPERIENCE

Senior Software Engineer (Mobile) | Narayana Health (Athma Health), Bengaluru, India | Apr 2023 – Present

- Leading Flutter developer responsible for architecting, designing, and developing scalable mobile applications for enterprise healthcare platforms.
- Designing and implementing robust UI components aligned with UX standards for high-traffic healthcare applications.
- Developing and maintaining applications including NH Care (1M+ downloads), HCCI Connect, and Kiosk Applications.

- Collaborating with product managers, backend teams, and QA to ensure seamless integration and timely delivery.
- Optimizing application performance, stability, and responsiveness through code refactoring and best practices.
- Ensuring compliance with security, data privacy, and healthcare standards within mobile applications.

Full Stack Developer (Flutter | Node.js) | Gogappi Pvt. Ltd., Bengaluru, India | Nov 2020 – Mar 2023

- Led the design and development of cross-platform mobile applications using Flutter for both Android and iOS.
- Developed and successfully launched Gogappi Consumer App (Android & iOS) and Gogappi Partner App (Android).
- Designed RESTful APIs and backend services using Node.js, integrated with Firebase for real-time data handling.
- Implemented secure authentication, order management, vendor onboarding, and payment-related workflows.
- Worked closely with startup stakeholders to translate business requirements into scalable technical solutions.
- Played a key role in application deployment, versioning, and Play Store/App Store releases.

Android Developer | FitnyTech, Bengaluru, India | Jan 2019 – Oct 2020

- Developed and deployed four Android applications: FitnyTech, Desipret Users, Desipret Designers, and Mitrajyoti.
- Contributed to both frontend and backend module development for the E2Buddy application.
- Implemented in-app purchases and subscription models, improving revenue generation and user engagement.
- Optimized app performance and UI flows, resulting in increased organic downloads and improved retention.
- Collaborated with cross-functional teams to implement feature enhancements and bug fixes efficiently.

PROJECTS

NH Care Mobile Application

- Developed Flutter-based healthcare application serving millions of users.
- Integrated appointment management, health records access, and secure authentication.
- Ensured high availability, performance optimization, and UI consistency.

Gogappi Consumer & Partner Applications

- Built cross-platform consumer app for discovering and ordering from local street food vendors.
- Developed partner app enabling vendors to manage orders, menus, and availability.
- Implemented Firebase real-time updates, Node.js APIs, and secure user authentication.

Fitness & B2B Applications (FitnyTech)

- Developed fitness-focused Android applications supporting training programs and subscriptions.
- Integrated in-app purchases, analytics, and user engagement features.
- Supported backend module development for E2Buddy enterprise application.

KEY ACHIEVEMENTS

- Led development of a healthcare mobile application with over 1 million downloads, supporting large-scale user traffic.
- Successfully launched multiple production-ready mobile applications across healthcare, food delivery, and fitness domains.
- Improved application scalability and performance through clean architecture and optimized state management.
- Implemented subscription and monetization strategies that increased app adoption and organic growth.
- Delivered end-to-end solutions in fast-paced startup and enterprise environments with consistent quality.
